

Scholarships available

Would you like to enhance your practice and increase your knowledge and confidence about mental health?

The scholarship is available to GPs, nurses and other health professionals working in primary care in the CMDHB area.

The scholarship supports postgraduate study.

It is not essential that the postgraduate study lead to a qualification such as a certificate, diploma or Masters degree. A single mental health related paper may be taken.

“ Doing these courses enhanced my knowledge and skills immensely. The content taught within the courses, utilising different teaching styles, affirmed and expanded my practice in ways that surprised me. It also added to my confidence to contribute more during our multi-disciplinary meetings.”

Yvonne Kainuku-Walsh
Youth Nurse Specialist

- **Information on what the scholarship funding includes e.g. GP locum and bureau nurse cover**
- **Frequently Asked Questions, Application Form, Eligibility and Closing Dates**
- **Information about the University of Auckland's courses especially developed for primary care professionals.**

“I don't think I would have considered the mental health courses if it hadn't been for the scholarship. Doing these courses was worth the effort. I now feel confident in treating common mental health problems myself and knowing when to refer on to secondary services.”
